## MANOEUVRABILITY WITH HIGH CLEARANCE

### Specially made to the needs of fruit tree nurseries

OC Group has designed the HC-TRAC originally for mechanical weeding in the rows and between the trees in the nursery. Thanks to the high clearance of 1700mm, the machine can effortlessly move over the rows. The light weight of the machine, enables the user to use the machine in when needed to keep the nursery clean from weeds.

Standard the machine is equipped with wide V-shares. Optionally finger weeders and other tools can be mounted. The machine also allows for mounting a sprayer with in-row nozzles.

Besides the specific use in fruit tree nurseries, the HC-TRAC also excels in other cultures where the same unique capabilities are required.

### STANDARD SPECIFICATIONS

Kubota V2403CR-T-E5, 4 cylinder, 2.4liter Turbodiesel, 50kW (65hp)

Stage V / Tier 4 Final (DOC + DPF)

4 wheel drive with Poclain MSE05

Tires 280/85R24
