ACCURACY AND PRECISION IN PALLETIZING

Palletizing made easy

We have customized our palletizing solution to meet the high European standards for safe and accurate palletizing. This resulted in this palletizer that handles your boxes up to 30kg with care on various different pallet dimensions. With different options of grippers, including foam gripper or suction cup gripper.

The machine can be optionally equipped with an infeed conveyor and can handle a dual infeed. For a safe working ,the machine is equipped with high class laser scanner and surrounded by a safety fence.

An user friendly touch screen allows the operator to create and store recipes for easy operation. The machine can easily be moved by pallet transporter if needed.

SPECIFICATIONS

Maximum load 30kg

Operation speed 7 up to 12 ppm depending on load

Pallet sizes up to 1200x1200mm

Palletizing height up to 2100mm including pallet

Power supply 380v – 3phase

Air supply 400l/min
